SENATE BILL 1752

Our Florida senate and Governor Christ voted into law the new **Senate Bill 1752**. This bill was signed into action on June 1st, it gives a two year extension for any development order, building permit and site plan issued by local government including Municipalities, County Agencies, Department of Environmental Protection and Water Management Districts. This bill does **NOT** extend Florida Department of Transportation permits. Any permit that expires between September 2008 and January 1, 2012 can be extended for two years from the expiration date provided the extension

request is filed by **December 31, 2010**. If you already extended your permits and development orders thru the previous **Senate Bill 360** you are eligible for another 2 year extension. Many of our clients have already benefited from this.

This bill affects most of the development in south Florida and can be a benefit to future growth and economic sustainability. If you have any more questions or need assistance extending your permits, land development orders and traffic concurrency please contact our office.

AMENDMENT 4 FAILS

After a year of fighting, lobbying and marketing against Amendment 4, the hard work paid off. We thank everyone for their hard work and dedication and to the people who voted NO. We are now more optimistic about the economic recovery in Florida.
